I am a Digital Designer currently working with Ola Cabs (ANI Technologies). I focus on Experience design for Mobile, Web, Softwares, Tablets and other Emerging Devices.

Experience - 5 years

1+ Years
May 2015 - Present

Ola Cabs (ANI Technolgies)
Role - Product Designer

Worked on various projects and features. The following are a few of the tasks I've worked upon

Ola Share: This is my major project in Ola. I'm a dedicated designer for this feature in the consumer app. Designed for all the three platforms (Android, iOS & Windows) based on the Business agenda.

Ola Store: My first project in Ola. I worked on the Search feature and the Order details for iOS app which lets users buy grocery from trusted vendors.

Ola Money: Designed the first version of the Ola Money app for iOS.

Ola Cabs: Zone Pickup Experience. A challenging problem that I've solved to a large extent for the Consumer app of Ola. This was a feature for a refined Pickup Experience within certain zones of the city.

Operator Statements: A four page excel sheet with billing information of the operators was converted into a simple, understandable Bill which was for both print and web attachment.

Ola Shuttle: First version of the Ola Shuttle driver app for Android tablet.

June 2011 - April 2016

Cognizant Technology Solutions
Role - Visual Designer

At cognizant I was a part of wide range of projects as independent contributor and as a team member. Have designed interfaces and graphics for internal portals, web apps, mobile etc for wide spectrum for clients from banking, pharma, technology, insurance, holiday, entertainment etc. Some of the clients that I worked for include Xerox, Amex, Toyota, Northern Trust, Honda, Novartis Mattel etc. I've also mentored the freshers who come onboard. Also been a member of the recruitment drives.

2 months
